It's about		these living things
Thumbs Up		this books inspires me to use it for Nature because of
What's in this book about Nature?	Main Nature theme	how to recognise this living thing where it lives life cycles humans need Nature 'living in harmony with Nature'
	part of Nature	farm life / native life / overseas life / garden life on land / in water / in air / a living thing / classification – eg plant, insect, mammal, bird, fish
	body and its parts	living things are descriptions by colours / shapes / coverings descriptions of body parts by these too counting of body parts, eg legs / wings sounds specialisations
	life cycles	creatures eg mating / births / young / adults plants eg seed / buds / flower / fruit
	links to rest of environment	'home' = place of shelter with food food chains what good they do
follow-up	anecdotes to share	from your family's life
	how we can care	our responses – emotional and actions
	Science = observe and 'record' (and share !)	possibilities for observations – in Nature / print/ screen ideas for art and craft based on observations
	looking further	check book for Science - notes / glossary / qns check non-fiction resources at Dewey number/shelf
